Bamboo Health

NarxCare®

A COMPREHENSIVE SUBSTANCE USE DISORDER PLATFORM WITH POWERFUL ANALYTICS AND CLINICAL RESOURCES FOR RISK ASSESSMENT AND PATIENT SUPPORT

NarxCare is a robust analytics tool and care management platform that helps prescribers and dispensers analyze real-time controlled substance data from Prescription Drug Monitoring Programs (PDMPs) and manage substance use disorder (SUD).

The Solution

NarxCare automatically analyzes PDMP data and a patient's prescription history to provide patient risk scores and an interactive visualization of usage patterns, helping providers identify potential risk factors. Prescribing and dispensing decisions can be based partly on objective insight into potential drug misuse, ultimately improving patient safety.

THE BENEFIT

Care teams make informed and more confident prescribing decisions for their patients.

NarxCare extends beyond information and insights to provide tools and resources which enable care teams to support patient needs and reduce the prevalence of SUDs. This is accomplished by increasing access to treatment, improving patient education and engagement, and enabling the coordination of care through powerful care team communications and clinical alerts.

Pharmacists and physicians use NarxCare scores as indicators to further review details in the patient's prescription history as they attend to the patients. NarxCare scores and reports are intended to aid, not replace, medical decision-making. None of the information presented should be used as sole justification for providing or refusing to provide medications.

HITRUST CSF Certified

Bamboo Health operates entirely within the privacy and security requirements set forth with HIPAA, including the encryption of all data in transit and at rest. NarxCare is also HITRUST CSF® Certified, meeting industry-defined standards when it comes to managing risk.
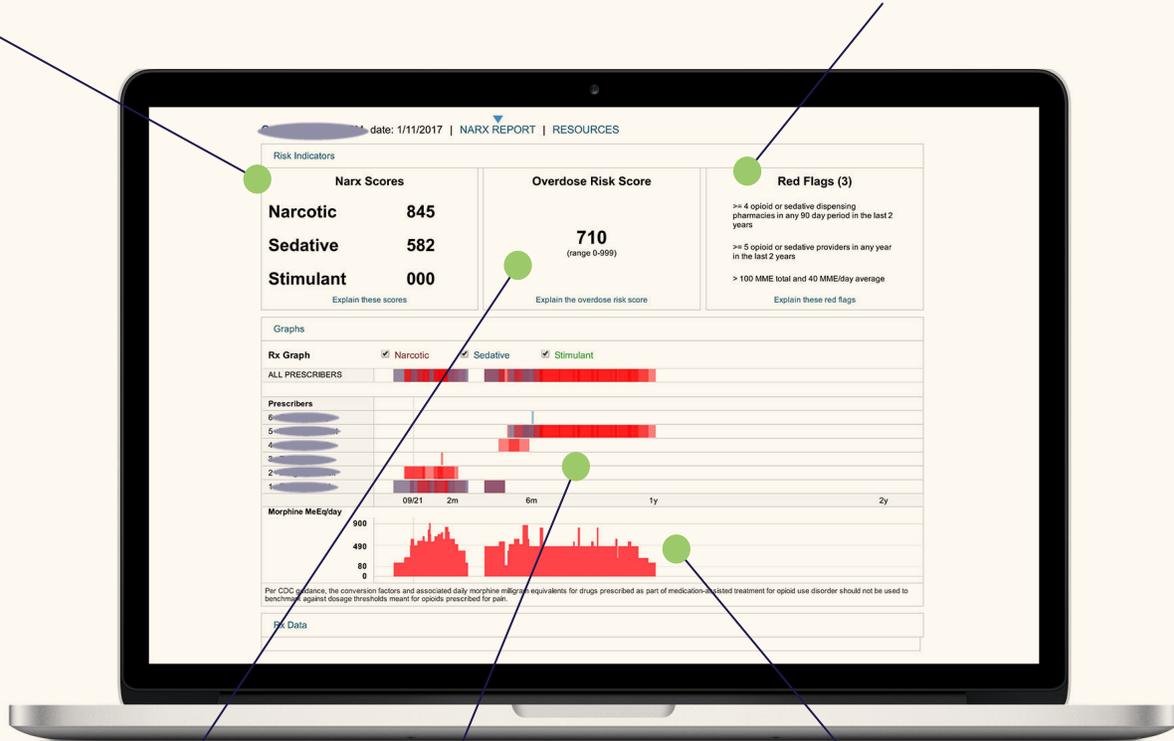

The Narx Report

The Narx Report includes a number of features and provides users with the ability to communicate with care team members and locate treatment options for patients in need.

1 THE NARXSCORES

The Narx Report includes a number of features that combine to give providers a comprehensive view of their patients and their patients' risks.

2 RED FLAGS

Offer customizable red flags, which alert users of possible unintentional overdose or other adverse events.

Risk Indicators

Narx Scores		Overdose Risk Score	Red Flags (3)
Narcotic	845		>= 4 opioid or sedative dispensing pharmacies in any 90 day period in the last 2 years
Sedative	582	**710** (range 0-999)	>= 5 opioid or sedative providers in any year in the last 2 years
Stimulant	000		> 100 MME total and 40 MME/day average
Explain these scores		Explain the overdose risk score	Explain these red flags

Per CDC guidance, the conversion factors and associated daily morphine milligram equivalents for drugs prescribed as part of medication-assisted treatment for opioid use disorder should not be used to benchmark against dosage thresholds meant for opioids prescribed for pain.

Rx Data

3 PREDICTIVE RISK SCORES

Incorporate relevant data into advanced and customized predictive models to calculate a patient's risk of a host of outcomes, including overdose and addiction.

4 RX GRAPH

Allows you to view the information you need, analyze data, and click into specific data points to see more detail.

5 PDMP DATA

Aggregates two years of historical controlled substance prescription data from providers and pharmacies, including quantities and active prescriptions.

"NarxCare has had the biggest impact of any tool we have integrated into the EHR."
