

A BAMBOO HEALTH SOLUTION

FOR SNFs

Manage & monitor patient populations across the entire care continuum

Bamboo Health is one of the nation's leading care coordination platforms that reduces the cost of healthcare by seamlessly connecting providers across the entire care continuum, both inside and outside of your network, so that your skilled nursing facility (SNF) can more effectively manage its patient populations.

Use Pings To:

- Capture hospital referrals through real-time discharge notifications, ensuring timely follow up and appropriate transitions of care
- Prevent outmigration by receiving real-time alerts on ED presentation to proactively engage the patient and pull them back to your SNF if clinically appropriate, helping increase census
- Strengthen referral relationships with your ACO and health system partners by providing visibility into patient care transitions and notifying them when one of their patients enters your SNF
- Receive real-time notifications on patients' care events (presentation, admission, transfer, or discharge) via SMS, email, and on the Pings web application

“The Pings solution has helped us strengthen relationships with other organizations in the community because providers can collaborate more closely to reduce readmissions and help get patients to the right care settings at the right time.”

- DIRECTOR, DATA & PERFORMANCE ANALYTICS, BANE CARE MANAGEMENT (MA)

“Having information at our fingertips through Pings has helped us maintain certain benchmarks, perform better, stay ahead of our competition, and provide better care to our patients.”

- VP OF BUSINESS DEVELOPMENT, LEGACY HEALTHCARE (IL)
