Spotlights FOR SNFs

Interactive, Real-Time Dashboards

USE SPOTLIGHTS TO VIEW AND IMPROVE HOSPITAL READMISSION RATES, MISSED CARE OPPORTUNITIES, AND ACO COLLABORATION

Care management resources are finite and the data available to find and support patients in need is often delayed. Spotlights solves this problem by providing real-time insights into patient- and center-level utilization trends compared to a lag time of weeks or months following claims data. This real-time view supports a reduction in both readmission penalties and costly overutilization.

Use Spotlights to:

Conduct root-cause analysis with patient-level drilldowns to develop process improvement initiatives for highest impact patients and care locations

Understand trends in missed care opportunities and view where patients go if they receive additional SNF care at a different facility

Identify trends in 30-day hospital readmission rates with daily updated data, both directly from your facilities as well as from the community
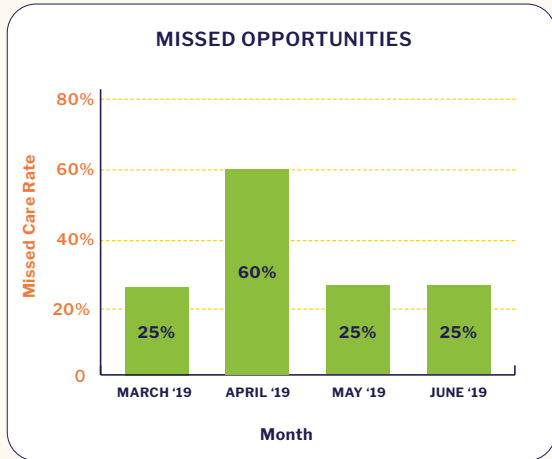

Streamline regular performance reviews with accountable care organization (ACO) and value-based care (VBC) referral partners by using shared data and reports, including hospital readmission rates, average length of stay, and patient referral volume

Bamboo Health operates entirely within the privacy and security requirements set forth with HIPAA, including the encryption of all data in transit and at rest. Spotlights is also HITRUST CSF® Certified, meeting industry-defined standards when it comes to managing risk.
