

A BAMBOO HEALTH SOLUTION

WITH DISCHARGE SUMMARIES

Ensure Effective Post-Discharge Follow-Up Care Coordination & Communication

Clinical data is often fragmented and can require a significant amount of detective work to get comprehensive discharge summaries – either by needing to communicate directly with the hospital or the patient/family. Bamboo Health now offers Discharge Summaries via our Pings platform for care coordinators to seamlessly access the appropriate clinical documentation they need for effective post-discharge follow-up care.

Use Discharge Summaries To:

- Conduct targeted post-discharge follow-up to successfully enroll patients in care management programs
- Avoid delays in waiting for clinical documentation for appropriate follow-up care
- Increase Transitional Care Management (TCM) visit opportunities through more prompt access to discharge summary documentation
- Access discharge summaries from the leading interoperability networks (Commonwell Health Alliance and Carequality)

Our Value Add:

Network Impact

Access discharge summaries based on our real-time admission, discharge, and transfer (ADT) data.

Workflow Solution

Streamline post-discharge follow-up workflows through our Pings software solution.
