NarxCare®

A ROBUST SOFTWARE PLATFORM WITH ANALYTICS TO SUPPORT REVIEW OF PDMP DATA.

NarxCare is a platform that provides a set of tools to support medical professionals’ analysis of controlled substance data from government managed and regulated PDMPs.

The Solution

NarxCare automatically analyzes PDMP data and delivers scores and visualizations of usage patterns based on that data, for further inquiry by medical professionals.

The NarxCare tools help medical professionals visualize important components of PDMP data. Instead of manually sifting through rows and rows of data, medical professionals can efficiently access the information when making prescribing and dispensing decisions.

Medical professionals use NarxCare scores as indicators to further review details in the patient’s prescription history while attending to their patients. NarxCare scores and reports are intended to aid, not replace, medical decision-making. None of the information presented should be used as sole justification for providing or refusing to provide medications.

THE BENEFIT

Medical care teams make informed and more confident prescribing decisions for their patients.

Bamboo Health operates entirely within HIPAA’s privacy and security requirements, including the encryption of all data in transit and at rest. NarxCare is also HITRUST CSF® Certified, meeting industry-defined standards when it comes to managing risk.
The Narx Report

1. **THE NARX SCORES**
The Narx Report provides PDMP data in a user-friendly and interactive format.

2. **STATE INDICATORS**
Offer state-customizable indicators, which provide additional awareness to authorized users to help avoid possible unintentional overdose or other adverse events.

3. **THE OVERDOSE RISK SCORE**
Helps an authorized user understand how a patient’s PDMP data may correspond to prescribing patterns associated with unintentional overdose deaths.

4. **RX GRAPH**
Allows the authorized users to view the data they need, analyze data and click into specific data points in more detail.

5. **PDMP DATA**
Aggregates government managed and regulated PDMP data on controlled substances, including data on prescriptions, providers and pharmacies.

“NarxCare has had the biggest impact of any tool we have integrated into the EHR.”

- Vivek Parwani, MD, MHA, FACEP
Medical Director, Adult Emergency Department
Yale New Haven Hospital
