

FOR HOSPICE

A BAMBOO HEALTH SOLUTION

Defend against revocations with real-time notifications and important patient context, within your existing workflows

Bamboo Health is one of the nation's leading care coordination platforms that reduces the cost of healthcare by seamlessly connecting providers across the entire care continuum, both inside and outside of your network, so that your hospice can more effectively manage its patient populations.

Use Pings To:

- Save potential revocation by receiving real-time alerts on ED presentation to proactively engage the patient and pull them back to your hospice if clinically appropriate.
- Strengthen referral relationships with your ACO and health system partners by providing visibility into patient care transitions and notifying them when one of their patients enters your hospice.
- Properly allocate field staff by identifying where patients are in real time to reduce the number of empty house visits.
- Receive real-time notifications on patients' care events (presentation, admission, transfer, or discharge) via SMS, email, and on the Pings web application.

How can we help improve hospice performance?
Tell us your needs.

[BAMBOOHEALTH.COM/CONTACT](https://bamboohealth.com/contact)

"Timeliness is an essential component of successful post-acute care. We no longer have to seek out our patients as they go through the continuum. Instead, the automated, immediate notifications let Residential be proactive in our outreach and ready as soon as we are needed for a smoother transition home."
