

Route

Achieve Complete E-Notifications CoP Compliance and Improve IT Operational Efficiency

The deadline for U.S. hospitals to comply with the CMS Interoperability and Patient Access Rule E-Notifications Condition of Participation (CoP) was May 1, 2021.

Route is a single solution that guarantees compliance with the CoP and seamlessly delivers e-notifications to all requesting post-acute and primary care providers and entities.* The solution manages all the complexities involved with sending e-notifications, from executing data sharing agreements to managing and implementing the frequent, real-time changes of varying patient roster types for patient-provider attribution tracking.

Use Route To:

-  Achieve full compliance with the E-Notifications CoP as mandated by CMS
-  Reduce IT burden as Route handles all outbound admission, discharge, and transfer (ADT) data feeds to both providers and HIEs/intermediaries
-  Offload the burden of managing all incoming provider requests for e-notifications via the Route Requester Portal
-  Succeed during CMS surveys as Route provides a complete audit trail of all e-notifications sent, written policies and procedures documents, and an at-a-glance view of data sharing

“Choosing Route to ensure compliance with the CMS E-notifications CoP was an obvious choice for our team, as we’ve seen how critical these notifications are to improving care coordination, enhancing value-based care initiatives, and most importantly, transforming patient outcomes. Route offers our clinical team increased IT operational efficiency to facilitate new levels of visibility and improved care.”

Chief Medical Information Officer,
Cone Health

Bamboo Health operates entirely within the privacy and security requirements set forth with HIPAA, including the encryption of all data in transit and at rest. Route is also HITRUST CSF® Certified, meeting industry-defined standards when it comes to managing risk.

*If a Route customer is ever found to have E-notification CoP deficiencies during a CMS survey as a result of Route, then we will deploy a Bamboo Health Compliance Expert onsite to help the hospital resolve the issue and develop the required corrective action plan within 10 business days at no cost.
