adults in OH have a
mental health condition

537,000*

adults in Ohio did not
receive needed mental
health care in the last year

1,739+

behavioral health
treatment referrals made
since B-CON's inception

62+

receiving organizations
within patient & outpatient
treatment services

PEOPLE IN OHIO DESERVE BETTER

To improve public health outcomes and increase access to behavioral health services, the Ohio Department of Mental Health and Addiction Services (OHMHAS) established the **Ohio Behavioral Health Connection (B-CON)**, powered by the OpenBeds solution. Through state sponsorship, providers are able to utilize the OpenBeds system to make and receive mental health and substance use treatment referrals.

OpenBeds helps to support processes, create connections and gives visibility to behavioral health treatment services statewide. It supports providers by sharing access to an embedded patient assessment tool, **real-time inventory of available mental health and substance use disorder (SUD) resources** for rapid referral to care and support for proper transitions of care.

OpenBeds has a public-facing system accessible at [TreatmentConnection.com](https://treatmentconnection.com). Treatment Connection is an evidence-based assessment and referral site, which enables community members statewide to find nearby, trusted treatment providers, evaluate the type of care they or their loved one needs, and submit anonymous or non-anonymous referral inquiries to providers.

Simply put, OpenBeds **helps Ohio increase access to behavioral health treatment** and better support its provider community and greater population to address those challenges.
