

OpenBeds®

FLORIDA BEHAVIORAL HEALTH
STATEWIDE CENTRAL AVAILABILITY NAVIGATOR

Problem

ORGANIZATIONS LACK KNOWLEDGE OF AVAILABLE RESOURCES TO MAKE INFORMED DECISIONS.

Solution

SERVICE AVAILABILITY DASHBOARD THAT LEADS TO OPTIMIZED CARE COORDINATION

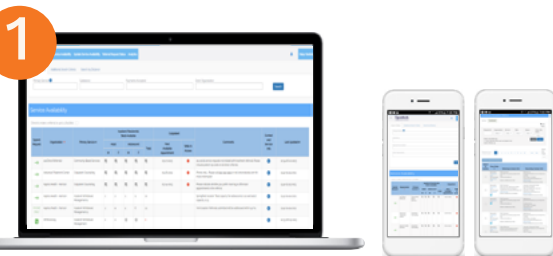

OpenBeds is a cloud-based solution that replaces inefficient and less effective manual search, faxes, phone calls and emails aiming to learn about availability at facilities. The OpenBeds solution accomplishes this by showcasing the variety of treatment offered across various organizations in the state and allows for transparency into their available beds. With this knowledge, providers can make more informed decisions for individuals in their care.

Benefits

- Conveniently search for open beds based on service type, location and more filters.
- View service details, demographics served and contacts at a variety of organizations in the state.
- Increased knowledge speeds up care coordination for individuals.

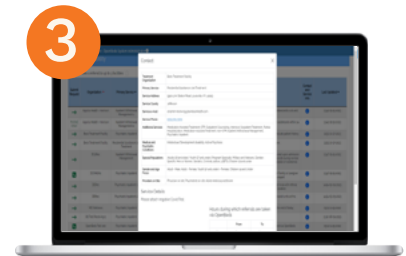

Statewide Availability at Your Fingertips

1 Search treatment options within the network using various filters.

2 See updated bed availability across the state instantly.

3 View service details to learn more about program and requirements for treatment

Bamboo Health operates entirely within the privacy and security requirements set forth with HIPAA, including the encryption of all data in transit and at rest. OpenBeds is also HITRUST CSF® Certified, meeting industry-defined standards when it comes to managing risk.
