

BH SCAN

NORTH CAROLINA BEHAVIORAL HEALTH STATEWIDE CENTRAL AVAILABILITY NAVIGATOR

Problem

ORGANIZATIONS LACK KNOWLEDGE OF AVAILABLE RESOURCES AND USE AN INEFFICIENT REFERRAL PROCESS

Solution

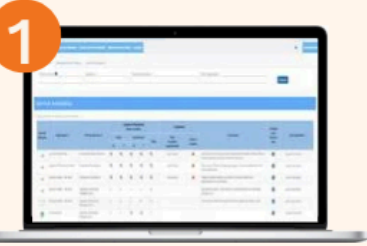

CLOSED LOOP REFERRAL NETWORK THAT LEADS TO OPTIMIZED CARE COORDINATION

BH SCAN is a cloud-based solution that replaces inefficient and less effective manual search, communication and reporting functions, facilitates rapid transfers/referrals, and fosters collaboration and coordination among care teams and treatment providers. The BH SCAN solution accomplishes this by providing real-time treatment facility availability, two-way digital provider communication, and an avenue to send digital referrals.

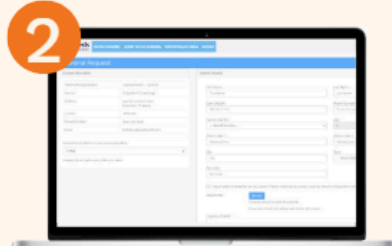

Benefits

- Conveniently search for open beds at treatment facilities.
- Efficiently make digital referrals to inpatient and outpatient facilities which offer the right level of care.
- Reduce client wait time for appropriate behavioral health treatment.

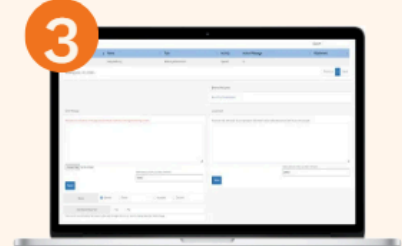

Referral to Placement in Minutes

See real-time availability of treatment options.

Create and send digital referrals.

Communicate between care teams and close the loop on referral requests.

Bamboo Health operates entirely within the privacy and security requirements set forth with HIPAA, including the encryption of all data in transit and at rest. OpenBeds is also HITRUST CSF® Certified, meeting industry-defined standards when it comes to managing risk.
