

# Reduce Overdose Fatalities With Co-Rx Clarity

Enhance your co-prescribing strategy for opioid use disorder (OUD) to improve patient outcomes

The opioid overdose crisis is evolving, and providers must adapt. Prescription Drug Monitoring Programs (PDMPs) remain essential but need expanded capabilities to keep pace with rising overdose fatalities.

Opioid overdose reversal medications are proven to reduce overdose fatalities yet remain **under-prescribed**.

## Did you know:

- Only **one naloxone prescription is dispensed for every 70 high-dose opioid prescriptions**.<sup>1</sup>
- States with co-prescribing mandates have seen an **estimated 16% reduction in overdose fatalities**.<sup>2</sup>
- **66%** of the 68,000 overdose fatalities in one year had at least one opportunity for intervention.<sup>3</sup>
- Opioid overdose reversal medication access varies widely — **dispensation rates differ more than 25x between U.S. counties**, indicating a need for greater consistency.<sup>4</sup>

Co-Rx Clarity empowers providers with real-time context during pivotal care moments to close these critical gaps and consistently apply prescribing best practices.

## What is Co-Rx Clarity?

Co-Rx Clarity integrates with PDMP workflows to:

- Identify patients who meet **CDC or state PDMP criteria** for overdose reversal medication co-prescribing and compliance.
- Automatically display **indicators** on the PDMP Patient Report with seamless workflow integration.
- Deliver streamlined **real-time patient notifications** to providers when patients qualify for overdose reversal medications per CDC guidelines or state mandates.
- **Ensure care continuity and receive** PDMP-specific prompts supporting co-prescription at point of care.

With Co-Rx Clarity, PDMPs and providers can strengthen compliance, support care teams and reduce preventable overdose fatalities.

## Knowledge You Need During Pivotal Care Moments: Why Bamboo

Co-Rx Clarity is **built directly into Bamboo Health's established PDMP ecosystem**, giving it unmatched reach and clinical utility.

**Unparalleled Network & Engaged Reach:** Bamboo Health hosts **the most powerful network of PDMP integrations nationwide**, already trusted by hundreds of thousands of prescribers and pharmacists.

**Seamless Workflow Integration:** Unlike standalone alerts or external dashboards, Co-Rx Clarity works within existing workflows (PMP AWARe® and PMP Gateway®) where prescribers and pharmacists are already making prescribing decisions, eliminating extra steps.

**State-Specific Compliance Support:** Co-Rx Clarity is tailored to reflect each state's regulations and CDC recommendations, ensuring prescribers and pharmacists are both informed and compliant.

To verify co-prescribing criteria seamlessly, see **Co-Rx Clarity** or **contact us**.
