

THREE MOVES TO MAKE THIS WEEK:

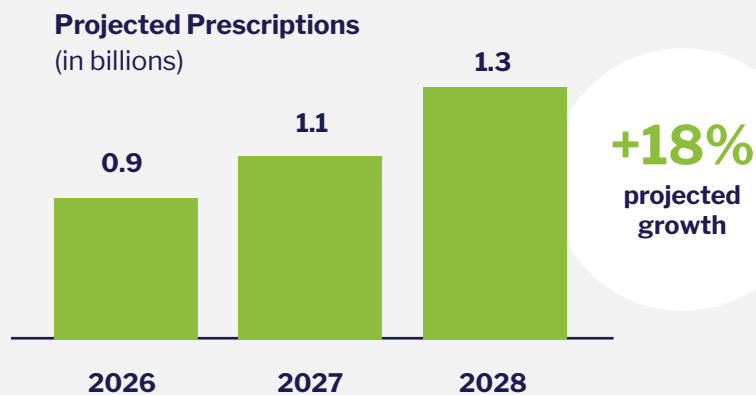

A Multi-State PDMP Action Card

THE MULTI-STATE MATH

Growth of US Mail Order Prescription Volume

Multi-state dispensing is scaling fast. **Is your PDMP workflow keeping up?**

Source: 2023 McKinsey Pharmacy Report; 2025 Mail Order Pharmacy Market Report.

Leading prescription monitoring experts suggest care teams:

1

Map Your Workflow

Ask where your PDMP check actually happens today. Who does it, how, and at what point in the dispensing process? Every manual decision point is a place where consistency can break down.

2

Tap Into State Education

Most state PDMP programs already offer training on reading and interpreting reports. Use it. A check only helps if the person reading the report knows what it's telling them.

3

Audit Your Credentials

Before you scale up integration, confirm your PDMP account logins and data are current. Outdated credentials or stale data create hurdles for any later multi-state expansion.

Multi-state dispensers need to prepare now to meet the patient safety, operational and compliance requirements of the future.

Still have questions about integrating PDMP data into your workflows?
