

Seamless Behavioral Health Care Navigation for Members

Bamboo Bridge® connects physical and behavioral healthcare with AI-powered, human-in-the-loop navigation.

Across **3 billion pivotal care events annually**, Bamboo Bridge helps health plans:

- Identify behavioral health needs and the best next step in care
- Supplement existing infrastructure to navigate members to definitive care
- Improve unnecessary ED and IP utilization, quality, readmissions and RAF

How Health Plans Achieve >90th Percentile Follow-Up Measures

Proven Outcomes for High Risk Members

Reduced admin burden with improved quality performance.

- 90th percentile FUH performance for 7-day and 30-day (Indiana)
- 16% decrease in readmissions for navigated patients
- ~120,000 Medicaid and D-SNP members across two regions (Virginia)
- Outcomes-based economic structure, targeting FUM impact

Built to Scale Nationally

Targeted, aligned partnerships expanding nationwide.

- Expanding to OK, MI, SC, IA, and TX with two national payers and a national Medicaid MSO
- Leveraging our privileged data assets and AI-enabled technology to reach members
- Targeting FUH, FUM, FUA and PCR quality metrics for partners at scale

Aligning Providers on Shared Outcomes

EHR-embedded referrals and close care team collaboration.

- 44% drop in ED utilization and 24% drop in IP utilization (Tufts)
- ~600 members served per month (Tufts)
- 46% of engaged patients attended 3+ post-discharge visits (Privia)
- 20%+ reduction in IP/ED utilization (Privia)
